

A016 SHARP

The Safety and Health Assessment and Research for Prevention (SHARP) program is dedicated to promoting healthy work environments and preventing workplace injuries and illnesses. Since 1990, SHARP has advanced workplace health and safety by conducting numerous research, monitoring, and demonstration projects. SHARP addresses complex occupational health and safety concerns by initiating in-house research projects and by responding to requests from employers, workers, business associations, industry groups, labor, health care professionals, and Labor and Industries staff. SHARP works with the Washington Industrial Safety and Health Act (WISHA) Advisory Committee and the National Occupational Research Agenda (NORA) to develop occupational health research priorities. SHARP is unique in the ability to work with business and labor to address emerging health and safety concerns in Washington State workplaces. SHARP is the primary research program in Washington that receives federal funding to track occupational illnesses and injuries.
